PROFESSIONAL SUMMARY

Linux & Production Support Engineer with **1.9+ years of hands-on experience** in Linux and Windows enterprise environments. Experienced in deploying and administering **SUSE Linux Enterprise Server (SLES)**, configuring and supporting **SUSE High Availability Clusters**. Skilled in Linux administration, Shell scripting, basic Ansible automation, Windows production support, and enterprise monitoring. Familiar with AWS fundamentals and Python automation, with a strong interest in DevOps, cloud technologies, and infrastructure automation.

TECHNICAL SKILLS

Operating Systems

- SUSE Linux Enterprise Server (SLES)
- Red Hat Enterprise Linux (RHEL) & Ubuntu
- Windows Server

Linux Administration

- Server Installation & Deployment
- User & Group Management
- File System Management
- Package Management (Zypper, YUM, APT)
- Service Management (Systemd)
- Process Monitoring
- Performance Monitoring
- Log Analysis
- Patch Management

High Availability

- SUSE High Availability Cluster
- Cluster Deployment & Monitoring
- Resource Configuration
- Failover Testing & Cluster Troubleshooting

Automation & Scripting

- Shell Scripting

- PowerShell
- YAML
- Ansible (Basic)

Cloud

- AWS (EC2, IAM, Security Groups, VPC Basics)

Programming

- Python (Basic)

Monitoring & Tools

- CCPulse / Pulse
- Git
- VS Code

Database

- MySQL (Basic)

Networking

- TCP/IP, DHCP & DNS
- SSH
- Basic Routing

PROFESSIONAL EXPERIENCE

System Support Apprentice

Accel Limited, Chennai
January 2026 – Present

Key Responsibilities

- Provide L1/L2 support for Windows production environments.
 - Monitor production systems and respond to infrastructure incidents.
 - Support Genesys applications and perform real-time monitoring using CCPulse/Pulse.
 - Troubleshoot Windows issues using event logs and system performance metrics.
 - Manage user accounts, permissions, and access requests.
 - Coordinate with application, infrastructure, and network teams during production incidents.
-

System Engineer – Trainee

OS3 Infotech Pvt. Ltd.

October 2023 – January 2025

Key Responsibilities

- Deployed and configured SUSE Linux Enterprise Server (SLES) in lab and production environments.
- Installed, configured, and supported SUSE High Availability Clusters using Pacemaker and Corosync.
- Configured cluster resources, constraints, and failover policies for highly available services.
- Performed cluster health monitoring, failover testing, and troubleshooting.
- Administered Linux servers including user management, package installation, service management, filesystem management, and log analysis.
- Performed server patching and routine maintenance activities.
- Automated routine administrative tasks using Shell scripting.
- Created and modified basic Ansible playbooks for Linux administration tasks.
- Investigated production issues and participated in Root Cause Analysis (RCA).
- Worked with senior engineers during Linux server deployment, upgrades, and maintenance activities.

PROJECTS

Enterprise Server Health Dashboard

Technologies: Python, Flask, PowerShell, WinRM, HTML, CSS, JavaScript, OpenPyXL

- Designed and developed a centralized server health dashboard for Windows infrastructure monitoring.
- Automated collection of CPU, memory, disk utilization, uptime, and operating system information using PowerShell.
- Connected securely to remote Windows servers through WinRM.
- Generated automated Excel health reports for infrastructure teams.
- Developed a web interface to display server health status and utilization.
- Implemented multithreaded server health collection for improved performance.

EXPERIENCE SUMMARY

Skill	Experience
Linux Administration	1.3 Years
Windows Production Support	7+ Months
SUSE HA Cluster	9 Months
SUSE Server Deployment	9 Months
Shell Scripting	6 Months
PowerShell	Basic
Python	Basic
Ansible	3 Months
AWS Fundamentals	Basic
Genesys Support	6 Months

EDUCATION

Bachelor of Science (Information Technology)

AKS University Satna (M.P.), with Total aggregate 70%.

Higher Secondary (Science - Mathematics)

Saraswati HS School Devendra-Nagar (M.P.), with Total aggregate 79.9%

ADDITIONAL INFORMATION

- Strong understanding of Linux production support and system administration.
- Hands-on experience with SUSE server deployment and High Availability cluster configuration.
- Good understanding of incident management, production monitoring, and troubleshooting.
- Passionate about learning Docker, Kubernetes, CI/CD, Infrastructure as Code, and Cloud technologies.

Career Objective

To grow as a Support / DevOps Engineer by strengthening skills in automation, cloud technologies, and high-availability systems while contributing effectively to stable production environments.
